- **5 year limited warranty**

The **MINI MX-360** is the most effective small, lightweight, portable light trap on the market. It's small design allows for placement in drop ceilings and crawl spaces to effectively capture and kill flying insects in hard to reach areas.

The four, 15-watt energy-efficient T5 U.V. insect lamps attract a wide range of insects to the large glueboards on either sides of the trap. The glueboard roller guides are designed for easy glueboard replacement and keeping them from sticking to the lamps.
